

About Us

Glazier's Resource is a drafting company specializing in quality professional shop drawings for the glass and glazing industry. Located in Concord, New Hampshire, we've serviced glass and glazing subcontractors throughout the United States for several years.

Founded by Gerry Lesmerises and Chris Conlon, Glazier's Resource has a team of glass and glazing drafting professionals committed to producing top quality shop drawings. All staff receive rigorous training in the specifics of glass and glazing to ensure that we meet your needs no matter what your specifications.

With more than 20 years in the industry, Gerry and Chris understand the needs of their customers. Prior to forming Glazier's Resource, Gerry worked as a drafting supervisor at a leading translucent panel manufacturer and later at a major glass shop where he was responsible for project management and drafting. Chris began his career as a drafter for a composite panel subcontractor and then moved to a large glass shop where he was responsible for drafting and CNC programming for door hardware.

Gerry and Chris, along with the entire Glazier's Resource team, are committed to quality work and unparalleled customer service. Let us produce the shop drawings for your next glass or glazing job.

Make us part of your glass and glazing design team

We work to your specifications, providing accurate layouts and custom detailing as required. We keep you informed every step of the way, and there's always someone available to answer your call and give you a status on your project.

Join glass and glazing subcontractors throughout the U. S. who turn to us for quality submittal drawings for commercial interior and exterior aluminum, glass, and glazed structures. Our detailed and accurate CAD shop drawings show all connections and meet your job-specific requirements. And, our contacts with all major manufacturers ensure that we follow manufacturer's specifications while attending to your needs.

Our team of professionals are experts in drafting, project management, field measurements and fabrication drawings, so you always get top quality shop drawings for your project.

- Quality CAD drawings designed for your specific needs mean easier architectural approvals.
- Our team of glass and glazing drafters ensures short lead times.
- Fair and economical pricing allows you to offer the best price to your customers. (Average sheet price only \$100.)
- With a fully staffed office, there's always someone to answer questions or give you a status on your project.
